DR. EGOLF DEVELOPS NEW CRAPEMYRTLES

Four hardy crapemyrtles with good resistance to powdery mildew have been developed by the agricultural research service of the USDA. The new varieties are the partial result of a department effort to produce superior ornamental plants through plant exploration, breeding and selection. The four new crapemyrtles - Catawba, Conestoga, Potomac and Powhatan - were developed at the US National Arboretum, Washington, D. C., by Dr. Donald R. Egolf, ARS horticulturist.

Dr. Egolf is an honorary member of the American Hibiscus Society and is doing work at the Arboretum with various species of Hibiscus also.

In 1885 we offered a dozen varieties
of Hibiscus -- now we have over 300.
We like 'em too much to quit now!

For plants, contact Eric or Sally Golby.

Sorry, no shipping or Sunday Sales.
